

# NATURAL FIBERS AND POLYMERS

In order to further diversify our reinforcement product portfolio with more products that aim to reduce the overall carbon foot print, we implemented a range of fabrics based on natural based fibers such as flax. These sustainable products will complement our existing reinforcement range addressing the modern challenges of climate change, while meeting the high expectations of our global customers.

## **ACTIONS BY C. CRAMER & CO**

- **USING NATURAL FIBERS AND POLYMERS TO DEVELOP NEW SUSTAINABLE SOLUTIONS**
- **FLAX**
- **LINEN**
- **COTTON**
- **POLAYMIDE 11**
